

MUKESH GUJJAR

Technical Lead — WordPress & Laravel | Senior Backend Developer

Surat, Gujarat, India | +91-6353691853 | gurjarmukeshgls@gmail.com | [linkedin.com/in/mukesh-gujjar-95958293](https://www.linkedin.com/in/mukesh-gujjar-95958293)
Open to: Remote / Surat-based roles

PROFESSIONAL SUMMARY

Technical Lead and senior full-stack developer with 10+ years leading engineering teams and building enterprise WordPress and Laravel platforms. Deep hands-on expertise across custom CMS architecture, payment infrastructure (Stripe, recurring billing, webhooks), performance optimization and security hardening, combined with ownership of architecture decisions, release management and mentorship for a cross-functional team. Recognized as Atlassoftweb's Highest Revenue Generator (2022, 2024, 2025) for project delivery contributing ₹1.8Cr+ in annual revenue, with a 90+ platform delivery track record across healthcare, education, logistics and membership domains for clients in the US, UK and Italy.

CORE STRENGTHS

- Team Leadership:** Leads a cross-functional team of 5 (developers, UI, QA); owns hiring input, code review standards and mentorship.
- Architecture & Delivery:** Designed two Laravel platforms from the ground up; owns production deployment and release/rollback strategy across concurrent environments.
- Business Impact:** ₹1.8Cr+ annual revenue delivery; 40% page-load improvement; 90+ platforms shipped; 99.9% uptime across client portfolio.
- Technical Stack:** PHP/Laravel, WordPress Core, React.js, MySQL, AWS (EC2/S3), Redis, CI/CD (GitHub Actions).

TECHNICAL SKILLS

Backend	PHP (OOP), Laravel, WordPress Core Development, REST APIs, GraphQL, Webhooks, Redis, Laravel Queues, Cron Jobs, CI/CD, GitHub Actions
CMS & Architecture	Custom Theme/Plugin Development, Headless WordPress, WooCommerce, ACF Pro, BuddyBoss, LearnDash
Frontend	HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), jQuery, React.js (Hooks, Components, API Integration), AJAX
Database & Infra	MySQL, MariaDB, AWS (EC2/S3), cPanel/WHM, Apache2
Tools	Git, GitHub/Bitbucket, Composer, NPM, Postman

PROFESSIONAL EXPERIENCE

Technical Lead — WordPress & Laravel

Atlassoftweb, Ahmedabad | Apr 2021 – Present

- Lead a cross-functional team of 5 (3 WordPress developers, 1 UI developer, 1 QA engineer), delivering 90+ WordPress and Laravel projects across healthcare, education, logistics and membership platforms.
- Built two internal Laravel platforms from scratch — an AMC management system and a modular CMS engine inspired by WordPress core architecture, including RBAC and a plugin-style module manager.
- Generated ₹1.8Cr+ in annual revenue through project delivery, earning the Highest Revenue Generator award in 2022, 2024 and 2025.
- Engineered custom Stripe payment gateways for UK, US and Italian platforms — handling subscriptions, recurring billing and webhook-driven payment lifecycle automation.
- Cut average page load time from 2.0s to 1.2s (40% improvement) via Redis caching, query optimization and asset/server tuning; closed SQL injection and XSS vulnerabilities across production sites.
- Built custom plugins for LMS and BuddyBoss platforms that removed dependency on paid third-party tools.
- Scaled and secured AWS EC2 infrastructure supporting a WordPress Multisite network of 40+ active subdomains with strong uptime.
- Own production deployment and release management, including rollback planning across multiple concurrent WordPress and Laravel environments, with deployment workflows automated via Redis queues, cron jobs and GitHub Actions CI/CD.

Senior WordPress Developer

Atlassoftweb, Ahmedabad | Apr 2020 – Apr 2021

- Architected flexible, client-manageable content structures using Advanced Custom Fields (ACF Pro) for enterprise clients.
- Built custom WooCommerce extensions enabling dynamic pricing and advanced shipping logic for high-volume stores.
- Maintained 99.9% uptime across the full client portfolio through proactive server management and monitoring.

WordPress Developer

Centricwebsolution, Ahmedabad | 2016 – Apr 2020

- Converted complex PSD/HTML designs into pixel-perfect, fully responsive custom WordPress themes.
- Built lightweight custom functionality using native WordPress hooks and filters, avoiding bloated page-builder dependencies.
- Managed deployment, migration and domain configuration for 100+ WordPress installations with zero data loss and under 15 minutes average downtime.

KEY PROJECTS

Atlas Content Management System (ACMS) — Laravel

- Led design and build of a modular Laravel CMS inspired by WordPress architecture for educational institutions, spanning Homepage Builder, Pages, Posts, Custom Post Types, Taxonomies, Custom Fields, Themes, Menus, Revisions, Users and Module Manager.
- Directed implementation of Role-Based Access Control (RBAC) across multiple administrative roles and architected the platform for extensibility, allowing new modules without major rework.
- Applied Redis caching, queues and GitHub Actions to improve application performance and deployment workflows.

AMC Service Management Platform — Laravel

- Architected a web-based application to track and manage Annual Maintenance Contracts end to end.
- Owned build of a centralized support ticket system with time-tracking for internal audits and automated email reporting to improve client transparency.

Lead WordPress Developer | Intro — Queer Desi Dating (2025)

- Led engineering of a custom WordPress theme for a matchmaking platform with advanced profile filtering, custom taxonomies and privacy controls.
- Oversaw build of custom Profile, Matches and Explore page templates with a seamless onboarding flow.
- Designed a real-time chat platform supporting 200+ concurrent users with secure 1:1 and group messaging.

Senior WordPress Developer | HelloNemo — Veterinary Telehealth (2023–2024)

- Owned build of a custom OOP-based WordPress theme powering online veterinary consultations.
- Directed integration of the Google Meet API for automated video scheduling and Stripe for secure vet/patient payments.
- Guided development of separate dashboards for Vets and Pet Parents, with automated Cron-based appointment confirmations and dispute handling.

WordPress Theme Developer | Global Logistics Networks — AiO, AON, Mega Move, Seahawk (2023–2024)

- Directed engineering across four global logistics network portals, implementing membership registration workflows, global member directories and 1:1 AGM event booking systems.

Dedicated Technical Lead | Italian EdTech Client — EpiCode, BeamMeUp, Brainteractive, PCTO (2021–2023)

- Served as long-term dedicated technical point of contact, directing engineering across four educational platforms.
- Oversaw customization of BuddyBoss and LearnDash workflows for learning management, coaching, recruitment and student engagement, plus tailored CRM, recruitment and KPI modules for multi-tier roles (Tutor, Coach, Admin).
- Directed integration of a frontend Monaco Editor for live coding practice and custom Stripe gateways for course enrollments.

WordPress Developer | East Cape Game Management, ECGMA (2020)

- Owned build of a membership portal with complex approval workflows for NARFO certification, integrating LearnDash for theory assessments and a custom module for practical assessment uploads.
- Automated recurring payment verification, PDF invoice generation and subscription renewal notifications.

AWARDS & RECOGNITION

- Key Contributor — Atlassoftweb (Nov 2025)
- Highest Revenue Generator — Atlassoftweb (2022, 2024, 2025)
- Make a Difference Award — Atlassoftweb (Nov 2021)

EDUCATION

Master of Computer Application (MCA) — GLS Institute Of Computer Technology, Ahmedabad | 2011–2014

Bachelor of Computer Application (BCA) — Smt. J.J. Kundaliya College, Rajkot | 2008–2011
